

## **Amended Chesapeake Bay Endangered Species Risk Assessment**

### List of Section Revisions

- Section 2.2: Scope
- Section 2.4: Characterization of Waters Inhabited by the Six Assessed Species
- Section 2.5: Action Area
- Section 3.2.3: Modeling Approach
- Section 3.2.3.2: Results
- Section 3.4: Monitoring Data
- Section 3.4.4: Chesapeake Bay Program Data
- Section 4: Effects Assessment
- Section 4.1: Evaluation of Aquatic Ecotoxicity Studies
- Section 4.3: Laboratory Effects Data
- Section 4.3.1.3: Sublethal Effects and Additional Open Literature Information in Freshwater Fish
- Section 4.6: Community-Level Endpoints: Threshold Concentrations
- Section 4.8: Incident Database Review
- Section 5.0: Risk Characterization
- Section 5.1.1: Risk Estimation
- Section 5.1.2: Risk Description, Direct Effects
- Section 5.2.2: Evaluation of the Potential for Atrazine to Induce Indirect Effects on the Shortnose Sturgeon, Dwarf Wedgemussel, and Sea Turtles from Reduction in Animal Food Items
- Section 6.2.6: Use of Threshold Concentrations as Community-Level Endpoints
- Section 6.2.8: Exposure to Pesticide Mixtures
- Section 6.2.9: Sublethal Effects

### List of Table Revisions

- Added new Table 4.1 (to address degradate toxicity) and renumbered proceeding tables
- Tables 4.3 and 4.4, Footnote A
- Table 4.4, Footnote A
- Table 5.2, Footnote C

### List of Appendix Revisions

- Appendix A: Ecological Effects (revised)
- Appendix B: Supporting Information for the Aquatic Community-Level Threshold Concentrations (revised)
- Appendix E: Incident Database Information (revised)
- Appendix J: Bibliography of ECOTOX Citations Not Used and/or Rejected (new)
